Given these functions, selecting the right format and content for documentation is crucial. Let's delve into the common types of occupational therapy documentation and examine practical examples.

Types of Occupational Therapy Documentation

Occupational therapists typically use several standardized formats, each suited for different purposes:

- Evaluation Reports
- Treatment Plan / Intervention Notes

- Progress Notes
- Re-evaluation Reports
- Discharge Summaries
- Billing and Coding Documentation

Below, we will explore each type with detailed examples.

Evaluation Reports

An evaluation report provides a comprehensive overview of the patient's current status, occupational performance deficits, strengths, and recommendations. This report often forms the basis for treatment planning.

Example of an Evaluation Report

Client Name: Jane Doe

Date of Evaluation: March 15, 2024

Referring Physician: Dr. Smith

Reason for Referral:

Jane is a 45-year-old woman recovering from a stroke, referred for occupational therapy to improve activities of daily living (ADLs) and upper extremity function.

Background Information:

Jane experienced a left MCA ischemic stroke three weeks ago. She has mild right-sided weakness, difficulty with fine motor tasks, and cognitive challenges including short-term memory deficits.

Assessment Methods:

- Observations during self-care tasks
- Standardized assessments: Modified Barthel Index, Nine-Hole Peg Test
- Patient interview

Findings:

- ADL Performance: Moderate assistance needed for dressing and grooming
- Motor Function: 4/5 strength in left extremities, difficulty manipulating small objects

Occupational therapy documentation examples play a crucial role in ensuring high-quality patient care, effective communication among healthcare providers, and compliance with legal and insurance requirements. Accurate, thorough, and standardized documentation not only supports clinical decision-making but also provides a record of progress, interventions, and outcomes. For occupational therapists, mastering the art of documentation involves understanding various formats, content expectations, and how to tailor reports to meet specific purposes—whether for billing, interdisciplinary collaboration, or legal documentation. In this comprehensive guide, we will explore practical occupational therapy documentation examples, best practices, and tips for creating clear, concise, and effective records.

Why Is Occupational Therapy Documentation Important?

Before diving into specific examples, it's essential to understand why documentation holds such significance in occupational therapy:

- Legal Record: Serves as an official record of care provided, supporting legal and ethical

accountability.

- Billing and Reimbursement: Demonstrates medical necessity and justifies services for insurance claims.
- Communication: Facilitates effective collaboration among multidisciplinary teams, caregivers, and patients.
- Clinical Tracking: Documents patient progress, guides treatment planning, and supports outcome measurement.
- Quality Assurance: Ensures compliance with standards and promotes best practices.

Types of Occupational Therapy Documentation

Occupational therapists utilize various documentation formats, each suited for different purposes:

- Evaluation Reports: Summarize assessment findings, diagnoses, and initial treatment plans.
- Intervention Notes (SOAP Notes): Record ongoing therapy sessions, progress, and modifications.
- Progress Notes: Track patient progress over time, often integrated into SOAP notes.
- Discharge Summaries: Conclude therapy services, summarize outcomes, and recommend follow-up.
- Treatment Plan: Outlines goals, planned interventions, and expected outcomes.
- Referral Letters: Communicate with other providers to recommend or request services.

Key Components of Effective Occupational Therapy Documentation

Regardless of format, good documentation generally includes:

- Client Information: Name, date of birth, medical record number.
- Date and Time: When the service was provided.
- Subjective Data: Patient's reported concerns, goals, or complaints.
- Objective Data: Observations, test results, measurable data.
- Assessment: Clinical interpretation of subjective and objective data.
- Plan: Next steps, interventions, and goals.

Sample Occupational Therapy Documentation Examples

- Evaluation Report Example

Client: Jane Doe

DOB: 01/15/1985

Date of Evaluation: 09/20/2023

Reason for Referral:

Patient was referred by primary care physician for assessment of upper limb function post-stroke.

Subjective:

Jane reports difficulty with fine motor tasks such as buttoning shirts and writing. She states, "I feel frustrated when I can't do things myself." She expresses a desire to return to cooking and work part-time.

Objective:

- Observed limited grip strength (measured at 15 lbs on the right hand).
- Difficulty with finger dexterity? timed 9 pegs in 60 seconds.
- Muscle tone was increased in the right upper limb.
- Range of motion within functional limits but with some pain reported during wrist extension.

Assessment:

Jane exhibits deficits in fine motor coordination and strength, likely impacting her activities of daily living (ADLs). The increased muscle tone suggests spasticity post-stroke, which may hinder functional recovery. Goals should focus on improving hand strength and dexterity to facilitate independence in ADLs.

Plan:

- Initiate therapy focusing on strengthening and dexterity exercises.
- Use splinting and stretching to manage spasticity.
- Reassess in 4 weeks to monitor progress.

- SOAP Note Example

Client: John Smith

Date: 10/10/2023

Session Duration: 45 minutes

S (Subjective):

John reports increased difficulty with dressing, especially buttons and shoelaces. He mentions feeling fatigued after performing household chores.

O (Objective):

- Demonstrated difficulty with buttoning a shirt?completed 2 buttons in 3 minutes.
- Demonstrated improved sitting balance and strength during functional tasks.
- Used adaptive equipment (button hook, sock aid) with some difficulty initially, but improved with practice.

A (Assessment):

John's dressing skills remain limited; fatigue impacts his participation. Adaptive strategies are helpful but require further practice. Progress is evident in strength and balance.

P (Plan):

- Continue with dressing activity practice, incorporating adaptive tools.
- Introduce energy conservation techniques.
- Assign home program focusing on fine motor and endurance activities.
- Reassess in 2 weeks.

- Discharge Summary Example

Client: Maria Lopez

DOB: 03/22/1978

Discharge Date: 11/15/2023

Reason for Discharge:

Goals achieved, and client demonstrates improved independence in daily activities.

Summary:

Maria was referred for occupational therapy following a fall resulting in wrist fracture. Over 8 weeks, she participated in strengthening, range of motion, and functional task training. Notable improvements include full wrist mobility, increased grip strength (from 20 lbs to 35 lbs), and ability to perform basic self-care tasks independently.

Outcome Measures:

- Fugl-Meyer Upper Extremity score improved by 15 points.
- Patient reported increased confidence and decreased frustration.

Recommendations:

Continue home exercises to maintain strength. Follow up with outpatient physical therapy if necessary.
